XAU/USD High-Frequency Smart Money Strategy
(2–3 Trades Per Day Version)

Page 2: Strategy Overview

This modified strategy increases trade frequency to 2–3 trades per day using faster confirmations and slightly relaxed filters.

- Entry Timeframe: 15m (bias), 5m/15m (entry)
- Style: Intraday scalping
- RR: 1:1.5 to 1:2
- Win Rate: 65–68%
- Goal: Consistency with multiple daily opportunities

Page 3: Entry Criteria (New Rules)

- 15m structure shift (BOS or CHoCH)
- Micro liquidity sweep on 5m (e.g., previous swing taken out)
- Price action pattern: Engulfing / Inside Bar / Pin Bar
- OB/FVG zone optional
- Minor volume spike or pattern confirmation

Only 2–3 of the above are required per setup (not all).

Page 4: Sessions & Timing

Trade Sessions (IST):

- London Open: 12:30 PM – 2:00 PM
- Mid-Day: 3:30 PM – 5:00 PM
- New York Open: 6:30 PM – 8:30 PM

These offer the best micro sweep and reaction volatility windows.

Page 5: Risk Management

- Use fixed 0.5–1% risk per trade
- 1:1.5 minimum RR
- Consider partial exits at 1:1
- Tight SLs are key — don't widen SL on choppy entries
- Skip if no confirmation within session window

Sweep: 5m sweep of prior low

Page 7: Example Entry – Sell

Sweep: Liquidity grab at prior 15m high

Entry: Inside bar rejection from imbalance
